Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson et al '720.

Nelson et al disclose all of the claimed features except for different formats and protocols supported by computing devices comprising peripheral interface component 314, live waveform monitor component 316, and a report generator component 318.

One of ordinary skill in the art would have found it obvious to provide the different formats and protocols for data encoding because Nelson et al teach the device component 313 may communicate via any number of structured communications schema. See the discussion related to Fig. 1, Fig.3, and Fig.4.

Regarding claims 3, 8, and 10, one of ordinary skill in the art would have found it obvious to maintain user interface definition and style sheets because Nelson et al teach any of the components of the IMD 112 may be reprogrammed without impact on other elements, as long as the component interface definitions are respected.

Art Unit: 3762

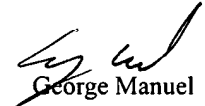

Regarding claims 12 and 16, it is inherent the LEM is capable of ascertaining the capabilities of the computing resources and specifying interface and layout criteria for the resources linked via the LEM. See the discussion related to LEM 212.
